The electorate is confined to male British subjects, or natives of the Protectorate capable of reading and writing English or Arabic, of twenty-one years of age, having resided for twelve months in the electoral district in which the vote is claimed.

The property qualifications are : in the Urban Electoral District, ownership or occupation of premises of not less than £10 in value, or receipt of a yearly salary of not less than £100 ; and in the Rural Electoral District, ownership or occupation of premises of not less than £6 in value, or receipt of a yearly salary of not less than £60.

No person is capable of being elected a member of the Legislative Council if he is not twenty-five years of age, if he has been dismissed from the Government Service or debarred from practising as a legal or medical practitioner by a competent authority, or is in the public service of the Colony or Protectorate, or is not registered as an elector. The property qualification for a member is the possession of real or personal property of the value of £250 for the Urban and £100 for the Rural Electoral Districts.

IMPORTS AND EXPORTS.

IMPORTS AND EXPORTS**1937.**

PREFATORY NOTE.

ALL TABLES RELATE TO THE CALENDAR YEAR.

“**IMPORTS FOR HOME CONSUMPTION**” includes goods entered for use in the Colony at the time of importation, and goods cleared for home use ex-warehouse.

Imports statistics do not include personal luggage, but parcels of dutiable goods are included in the statistics.

COUNTRIES TO WHICH IMPORTS AND EXPORTS ARE CREDITED.

Imports are classified as received from the countries of origin.

Exports are credited to countries of final destination.

METHOD OF ASCERTAINING QUANTITIES AND VALUES OF IMPORTS AND EXPORTS.

The statements of quantities and values are based on the declaration of importers and exporters and subsequently checked by the Customs. Where goods are entered by weight the quantities shown as imported (except in cases where duty is charged on the gross weight) and exported represent the net weight exclusive of packages, sacks, casks, etc., in which they may be contained.

The value of imports are exclusive of the amount of duty, and are “c.i.f.”; the values of exports are “f.o.b.” values, inclusive of export duty.

Imports by parcel post are not classified according to their nature but are separately recorded, and are entered according to value.

| Timber ... | No concessions granted, only few licences to fell trees. | Nil | <p>The timber industry, a very small one, is chiefly carried on by the native sawyers and canoe makers who work in unreserved forests over which Government have no control.</p> <p>From the reserved forests, most of which at present are rather inaccessible, no large supplies of timber were obtained excepting from the Kambui Reserve at Kenema. Other reserves were practically untouched during the year and are still undeveloped.</p> <p>Native—and small scantlings. Fourteen licences were issued to cover these operations. In the reserved forests, ninety-seven licences were issued to fell trees for local use. The departmental out-turn of sawn timber amounted to 222,274 superficial feet.</p> |

In various parts around Freetown, where there are tidal rivers, a fair quantity of fish is caught by setting traps with galvanized wire netting. Trammel nets have also been tried but unsuccessfully, although a kind of net made locally is used in some portions of the Southern Province in the same way as trammel nets.</p> <p>In 1928, an investigation was made into the fishery resources of Sierra Leone by Mr. J. Hornell, late Director of Fisheries to the Government of Madras. The result of the investigation is embodied in a report which is obtainable from the Government Printer, Sierra Leone. Mr. Hornell recommended that the quantity and quality of the fish abounding off the coast of the Colony are worthy of commercial exploitation.</p> |

| State Area which has been Geologically surveyed. Note any important Mineral Deposits known to exist, but not at present worked. | | | | <p>The potential water power resources of Sierra Leone are very great. The average rainfall over the whole of Sierra Leone is more than 100 inches per annum, and nearly all of the big rivers and many of the smaller streams descend from the high plateaux in the northern and eastern portions of the Protectorate by a series of falls and rapids. Important falls and rapids occur in the same streams in their courses across the coastal plain.</p> <p>Near Pundaru, the Sewa River falls 300 feet, including a vertical fall 105 feet high, in about 1½ miles. The ordinary minimum run off at this point is roughly 1,000 cusecs.</p> <p>Near Bumbuna, the Rokell (Seli) River falls about 200 feet in 2 miles, and near Marampa there are falls and rapids, aggregating 50 feet in height, on the same river. The run off at the latter place is very large.</p> <p>At Bitiri (Bitmai) near Mamaya the Pampana River falls about 120 feet in 0.15 mile.</p> <p>Important falls also occur in the Taia River near Mongeri, and in the Moa River near Daru.</p> | | | |

There are no manufactures in the Colony or Protectorate. Simple articles for local use are made, the more important being baskets, boats and canoes, boots, shoes, sandals, coco-nut oil, cotton cloths, coarse dyestuffs (principally indigo), fishing-nets, seines, furniture, ground-nut oil, hammocks (cloth and grass), leather, building lime made from oyster shells, mats, palm oil, pottery, ropes and fishing lines, soap. Two companies (Freetown Cold Storage Company and the Crown Bottling Company) manufacture ice and mineral waters.

SUMMARY OF INDUSTRIAL DEVELOPMENT.

An Agricultural Station for the introduction and breeding of rice was opened in the Scarcies Area in 1934, with a view to developing an export industry in this product. Good results are being obtained from this station and successful rice are being multiplied and distributed. Owing to the rapid development of mining, and the change over of several thousands of labourers from farming to mining, an internal market for rice, which did not exist before, has come into existence. This market must be supplied before an export industry can be developed.

The Government Rice Mill, Cline Town, was completed in 1936 and the milling of rice was commenced.

The Taungya system of improving the natural forests is being continued in four forest reserves. An enumeration survey is in progress and exploitation has been successfully begun departmentally.

There was an increased activity in mining and an interest was shown in all the known major mineral deposits. Record productions of diamonds and iron ore were returned and towards the end of the year small shipments of chromite were made. All gold came from alluvial sources and the production declined slightly.

A few individuals continued mining alluvial platinum.

The Sierra Leone Development Company, Limited, mined the Marampa hæmatite deposits throughout the year. The strong demand for iron ore was maintained.

The Sierra Leone Selection Trust which holds a monopoly for diamonds in Sierra Leone made considerable progress. The Sierra Leone Goldfields, Limited, started opening up the chromite deposits near Hangha under an exclusive prospecting licence and made trial shipments to test the quality of the ore and to explore the markets for it.
